**Jobs Report Fires Warning Shot For Rates**

Interest rates have been on a tear. They've fallen faster and farther than at any other time in the past 8 years. By some measures, they've managed to maintain positive momentum for as long as they ever do. This naturally begs the question: is it time for a bounce?

Investors expected some clarity on that question from this week's economic data. This was the first look at several of the **most important** reports since the last Fed meeting. At that meeting, the Fed acknowledged investor expectations for rate cuts in 2019, but on the condition of lackluster economic data.

In that regard, this week provided some **massively mixed messages**. At first, it looked like the data would indeed endorse a continuation of the trend toward even lower rates. The Institute for Supply Management (ISM) released its Purchasing Managers Indices (PMIs) for the manufacturing and non-manufacturing sectors on Monday and Wednesday respectively. Although they weren't very far from forecasts, both qualified as lackluster as they did nothing to challenge the notion that we're in one of the weaker patches of the economic cycle.

Manufacturing Index

**National Average Mortgage Rates**

	Rate	Change	Points
<b>Mortgage News Daily</b>			
30 Yr. Fixed	6.43%	+0.02	0.00
15 Yr. Fixed	5.95%	0.00	0.00
30 Yr. FHA	5.82%	+0.02	0.00
30 Yr. Jumbo	6.62%	0.00	0.00
5/1 ARM	6.28%	-0.01	0.00

**Freddie Mac**

30 Yr. Fixed	6.35%	-0.51	0.00
15 Yr. Fixed	5.51%	-0.65	0.00

Rates as of: 8/30

**Market Data**

	Price / Yield	Change
MBS UMBS 5.0	99.35	-0.16
MBS GNMA 5.0	99.91	-0.04
10 YR Treasury	3.9039	+0.0424
30 YR Treasury	4.1932	+0.0468

Pricing as of: 8/30 5:59PM EST

**Recent Housing Data**

	Value	Change
Mortgage Apps	Aug 28 226.9	+0.49%
Building Permits	Mar 1.46M	-3.95%
Housing Starts	Mar 1.32M	-13.15%
New Home Sales	Mar 693K	+4.68%
Pending Home Sales	Feb 75.6	+1.75%
Existing Home Sales	Feb 3.97M	-0.75%
Builder Confidence	Mar 51	+6.25%

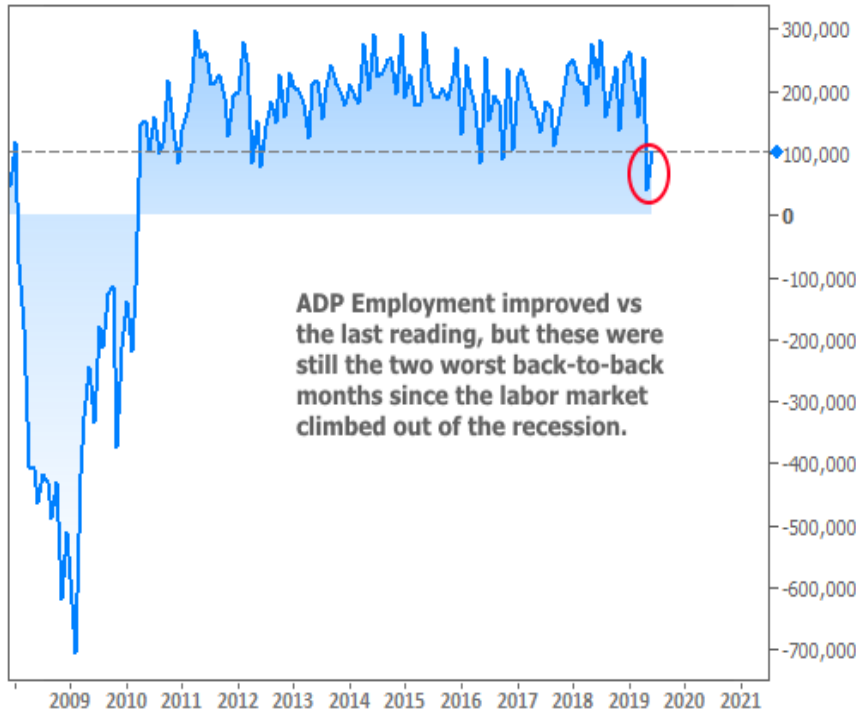

Non-Manufacturing Index

ISM PMIs are two of the most important monthly economic reports in terms of the ability to influence interest rates. They're second only the Employment Situation (aka "the jobs report" or "NFP" for its headline component: nonfarm payrolls) and occasionally the ADP Employment Report, which can be used as an early indicator for NFP.

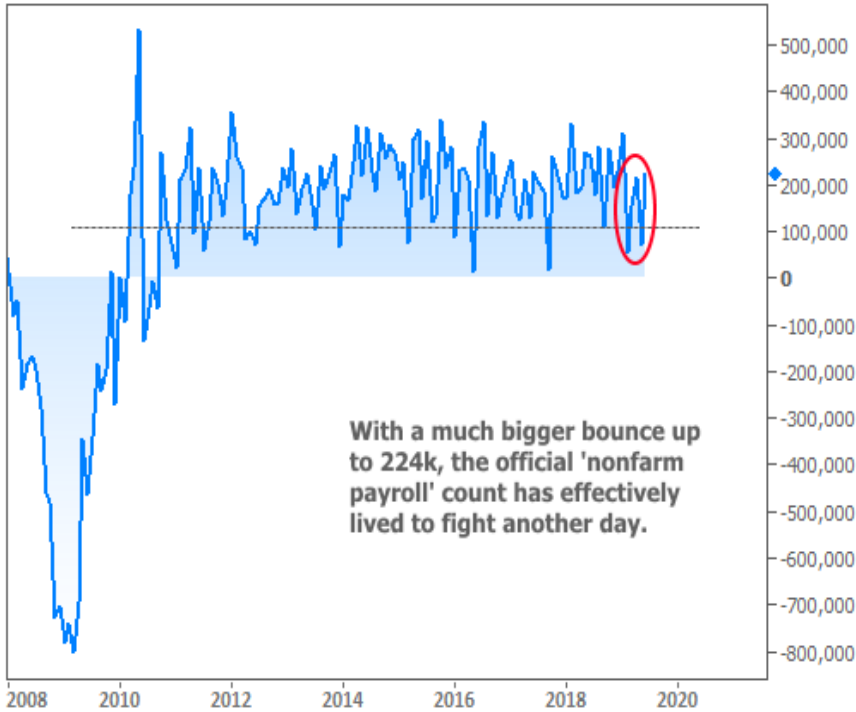

ADP and NFP were more closely watched than normal this week because both were quite a bit lower than normal last time around. ADP was first up on Wednesday. While it didn't convey quite as much weakness as last time, it was weak enough to keep rates **at long-term lows** (and to keep anticipation running high for Friday's NFP number).

ADP Employment

NFP also bounced back, but in **much grander fashion** than ADP, coming in at 224k compared to 72k last month--handily beating the median forecast of 160k.

Nonfarm Payrolls

Whereas Wednesday's data helped rates to break below the recent trend of "higher lows" (lower red line in the following chart), Friday's jobs data completely reversed those gains.

10yr Treasury Yield

At first glance, that may **look** like defeat for fans of low rates. Indeed, that may prove to be the case in the coming days. But Friday's rate spike stalled out at a level that leaves **some room for hope**. In terms of the 10yr Treasury yield (the best benchmark for momentum in long-term rates like mortgages), rates bounced perfectly on the ceiling that's been intact since the June 19th Fed meeting.

All that to say that although the jobs report **raises doubts** as to just how eager the Fed should be to cut rates, investors aren't giving up on the idea easily. That makes good sense considering the economic picture is too complex for a single economic report to adequately capture. The jobs report may remove some apprehension about a shift in the labor market, but it doesn't magically erase weakness seen in other reports.

The most important repercussion of this week's data is for the Fed. Had NFP been weak, it would have been an easy call for the Fed to cut rates in their meeting at the end of July. Had the ISM and ADP data been as strong as NFP, leaving rates unchanged would have been a similarly easy call. As it stands, the implication is **somewhere in between**. We'll have a great sneak peek at the Fed's thought process in light of this data when Fed Chair Powell delivers his semi-annual congressional testimony on Tuesday and Wednesday next week.

## Service oriented, responsive, competitive rates and an in depth knowledge of todays mortgage market

After completing my degree in finance at the University of Connecticut, I started in the mortgage business right out of college in 2004. With 15+ years of experience and a primary objective of thoroughly explaining all available loan options to my clients with what is typically the largest investment in their lives, I strive to always make myself available. I constantly educate myself with respect to the mortgage industry and underwriting guidelines for FHA, VA, conventional and jumbo financing. I deliver on the expectations discussed up front and provide the service level my clients deserve from day one. I will remain in touch throughout the process and continue to follow up with you after closing. My goal is to wow you and turn you into clients for life. I want you to be so impressed that throughout and after the process you share my information with your friends, family, neighbors and co-workers who may value from my services.
