New Home Sales Surge to 7-Year High, but Context Remains Important

Sales of newly constructed single-family houses, unlike their existing home counterparts, **continued to rise** in August. While existing home sales overall fell by 4.8 percent in August and single family sales by 5.3 percent, new homes sold at a seasonally adjusted annual rate of 552,000 units, an increase of 5.7 percent from July's sales and **21.6 percent higher** than sales in August 2014 of 454,000. The August sales rate was the highest in more than 7 years and was far above analysts' expectations of 515,000. Context is important though...

The *New Residential Sales* report, jointly produced by the U.S. Census Bureau and the Department of Housing and Urban Development also contained revised July sales numbers. These were raised to 522,000 from the 507,000 estimate originally provided. The revision put July in third place for sales over the last 12 months, exceeded only by August and by February 2015's rate of 545,000 units.

On a non-seasonally adjusted basis the report estimates there were **45,000 newly constructed homes** sold in August compared to 44,000 in July and 36,000 a year earlier.
