## The Real Reasons Mortgage Rates Can't Keep Up

Following The UK's vote to leave the EU, headlines have been awash with "all-time low rates." While that's abundantly true for benchmark rates like US Treasuries, mortgage rates **aren't quite there yet**--nor have they moved lower at the same pace. What's up with that?

First thing's first. Mortgage rates are **not** based on the 10yr Treasury note (for space-saving purposes, I'll call them "Treasuries" or simply "10's" from here on out). This is a common misconception that exists for a **great reason**: mortgage rates and 10s have moved together almost perfectly throughout history. The relationship broke down a bit heading into the financial crisis (investors didn't really want to buy mortgages), but it became **stronger than ever** thanks to ongoing support from the Fed and stringent underwriting standards.

In other words, investors could rest easy knowing there would constantly be a big buyer in the market if they needed to sell (because the Fed instantly became the biggest buyer of mortgages as a part of its various stimulus efforts, and the buying amount was guaranteed ahead of time!). Moreover, if they didn't need to sell, they knew these loans were at least being **held to a higher standard** than those seen before the financial crisis.

When we talk about "buying mortgages," what we're really referencing are the bonds that are created when groups of similar mortgages are packaged together and sold to investors. These mortgage-backed-securities (MBS) are the **lifeblood of mortgage rates**. When investors buy more, rates fall.

Because of the positive factors mentioned above, investors generally buy MBS at a similar pace to Treasuries. But sometimes the relationship gets a little bit out of sync--especially during times of exceptional volatility.

As we already know, the time frame surrounding Brexit (The UK's vote to leave the European Union) has been an **exceptionally volatile** time for financial markets. In general, when volatility is driving toward lower rates, Treasuries win and mortgages lag. The past few weeks are no exception.

## National Average Mortgage Rates

	Rate	Change	Points
--	------	--------	--------

### Mortgage News Daily

30 Yr. Fixed	6.43%	+0.02	0.00
15 Yr. Fixed	5.95%	0.00	0.00
30 Yr. FHA	5.82%	+0.02	0.00
30 Yr. Jumbo	6.62%	0.00	0.00
5/1 ARM	6.28%	-0.01	0.00

### Freddie Mac

30 Yr. Fixed	6.35%	-0.51	0.00
15 Yr. Fixed	5.51%	-0.65	0.00

Rates as of: 8/30

## Market Data

	Price / Yield	Change
MBS UMBS 5.0	99.37	+0.02
MBS GNMA 5.0	99.93	+0.02
10 YR Treasury	3.9068	+0.0029
30 YR Treasury	4.1960	+0.0028

Pricing as of: 9/1 7:34PM EST

## Recent Housing Data

	Value	Change
Mortgage Apps	Aug 28 226.9	+0.49%
Building Permits	Mar 1.46M	-3.95%
Housing Starts	Mar 1.32M	-13.15%
New Home Sales	Mar 693K	+4.68%
Pending Home Sales	Feb 75.6	+1.75%
Existing Home Sales	Feb 3.97M	-0.75%
Builder Confidence	Mar 51	+6.25%

*\*Based on mortgage-backed-securities trading*

Taking this a step further, we can easily answer the question of why mortgage rates aren't quite at all-time lows. It's actually **very simple**: the prices of MBS aren't yet back to the levels seen during the all-time low rates of late 2012 and early 2013!

Nothing else is needed to explain the current mortgage rate environment, but just in case you need extra convincing, consider the fact that the average fees imposed by Fannie and Freddie are roughly 0.09% higher today (in terms of rate) versus late 2012. That means rates should still be about 0.09% higher even if MBS Prices were at late 2012 levels. Add the additional lender expenses from new regulatory requirements and **today's rates are actually LOWER** than the behind-the-scenes numbers suggest they should be.

None of this is of dire importance in the big picture, but it's important to know that lenders aren't simply "**being greedy**" by not lowering rates faster than they already have. Even if MBS buyers manage to get prices back to late-2012 levels, lenders will still need some time to get rates as low as possible. It's something that will happen faster for some lenders than others, depending on the structure of their business.

And regardless of business structure, all lenders **have to be careful** how quickly they drop rates due to fallout. This happens when a loan in process at any particular lender is canceled. In this environment, that would likely be due to the borrower pursuing a lower rate. But the original lender incurs several costs on that borrower's file, and those costs end up being paid by all mortgage borrowers in the long run. Bottom line: when fallout is minimized, lenders can offer their most aggressive rates.

## Housing News

This week was light on housing-specific data, with CoreLogic's **Home Price Index** being the only notable release. It showed ongoing strength in OR, WA, and CO, but a **potentially disconcerting deceleration** in the pace of gains nationwide.

Adding to a less upbeat tone, Fannie Mae released its monthly **Home Purchase Sentiment Index** which showed **ebbing confidence** in home price appreciation and a high ratio of inclined sellers to buyers.

## Service oriented, responsive, competitive rates and an in depth knowledge of todays mortgage market

After completing my degree in finance at the University of Connecticut, I started in the mortgage business right out of college in 2004. With 15+ years of experience and a primary objective of thoroughly explaining all available loan options to my clients with what is typically the largest investment in their lives, I strive to always make myself available. I constantly educate myself with respect to the mortgage industry and underwriting guidelines for FHA, VA, conventional and jumbo financing. I deliver on the expectations discussed up front and provide the service level my clients deserve from day one. I will remain in touch throughout the process and continue to follow up with you after closing. My goal is to wow you and turn you into clients for life. I want you to be so impressed that throughout and after the process you share my information with your friends, family, neighbors and co-workers who may value from my services.
